

SACHIN S P

Java Full Stack Developer

Mob. +91 6362048847 | Email: spsachin0299@gmail.com | Bengaluru |

LinkedIn: <https://www.linkedin.com/in/sachin-s-p-b89845247>

PROFESIONAL SUMMARY

Results-driven Java Full Stack Developer with around 4 years of experience designing, developing, and deploying scalable enterprise web applications. Expertise in building RESTful microservices and responsive single-page applications using modern frameworks. Proven track record of optimizing application load times and collaborating with cross-functional teams in Agile environments.

EDUCATION

Bachelor of Engineering in Electronics & Communication Engineering (ECE)

2019-2022

Adichunchanagiri Institute of Technology,
Chikkamagaluru, 2019-2022

TECHNICAL SKILLS

- **Languages:** Java 8/17/21, JavaScript, SQL
- **Backend Frameworks:** Spring Boot, Spring MVC, Spring Security, Hibernate, Spring Data JPA, JDBC, Struts (Legacy)
- **Frontend Technologies:** HTML5, CSS3, React JS, Bootstrap
- **Software Architecture:** Microservices, RESTful APIs, SOAP API's, Monolithic Architecture
- **Databases:** MySQL, Oracle
- **Tools & DevOps:** Git, SVN, Jmeter, Docker, Kubernetes, Kafka, Jenkins, Maven, Gradle, AWS (EC2, S3, RDS), Postman, Apache Tomcat, JBoss, WebSphere
- **Methodologies:** Agile/Scrum, Test-Driven Development (TDD), CI/CD pipelines
- **AI-assisted Development Tools:** GitHub Copilot, ChatGPT, Claude (AI-assisted plan, coding, debugging, and development support)

PROESSIONAL EXPERIENCE

Tata Consultancy Services | Bengaluru, Karnataka

Java Full Stack Developer | May 2025 – Present

- Developed and maintained enterprise Java full stack applications using **Java, Spring Boot, REST APIs, Hibernate/JPA, SQL, HTML, CSS, and JavaScript**.
- Modernized legacy applications by migrating **EJB** and **Struts**-based applications to **Spring Boot**, improving maintainability and scalability.
- Upgraded applications from **JDK 1.8 to JDK 21**, resolving compatibility issues and leveraging modern Java features.
- Migrated applications from **IBM WebSphere** and **Oracle WebLogic** to **JBoss/Tomcat** including deployment, configuration, and environment validation.
- Automated application deployments by implementing **Jenkins CI/CD pipelines**, replacing manual deployment processes.
- Developed **JUnit** test cases, performed performance testing, and optimized application performance by tuning SQL queries and database operations.
- Participated in code reviews, debugging, defect resolution, and release activities to ensure application stability and reliability.

Technologies: Java, JDK 8/21, Spring Boot, REST APIs, EJB, Struts, Hibernate/JPA, SQL, JUnit, Postman, Jenkins, IBM WebSphere, Oracle WebLogic, JBoss/Tomcat, Checkmarx, Git, Maven, Agile Scrum.

Integra Micro Systems Pvt Ltd | Bengaluru, Karnataka
Senior Software Engineer | Dec 2022– May 2025

- Developed and maintained enterprise full stack applications using **Java, Spring Boot, Spring MVC, React.js, REST APIs, Hibernate/JPA, and MySQL**, delivering scalable and reliable business solutions.
- Designed and integrated RESTful APIs with the React frontend, resolved UI issues, developed new components, and optimized SQL queries to improve application performance.
- Participated in the complete **Software Development Life Cycle (SDLC)**, including requirement gathering with business stakeholders, solution design, development, testing, deployment, and production support.
- Developed **JUnit** test cases, performed API testing using **Postman**, and supported performance testing to ensure application quality, reliability, and stability.
- Collaborated with cross-functional teams in an **Agile/Scrum** environment, participated in code reviews, resolved defects, and contributed to continuous application enhancements.
- Supported application deployments, monitored production releases, investigated production issues, performed root cause analysis, and implemented timely fixes to ensure seamless business operations.

PROJECTS

GeoRLU (Insurance Domain – Client: Aviva | TCS)

- Migrated a legacy **EJB-based insurance rating application** to **Spring Boot** as part of enterprise modernization.
- Developed and enhanced **REST APIs for insurance rate factor calculation** across multiple policy types and rating parameters.
- Involved in end-to-end activities including development, testing, deployment, and production support during migration.

BLive (Insurance Domain – Client: Aviva | TCS)

- Migrated a legacy **Struts-based insurance application** to **Spring Boot**, improving scalability, maintainability, and performance.
- Converted and standardized legacy REST APIs into **Spring Boot RESTful services** for better backend integration and consistency.
- Supported backend development, testing, defect resolution, and production support during migration and stabilization.

IBkart (FinTech– Client: IMSPL)

- Developed a secure agent-assisted platform supporting services such as DMT, AEPS, Micro-ATM, recharges, insurance, and travel bookings (IRCTC, RedBus) across 20+ Indian states.
- Built using **Java, Spring Boot, React.Js REST APIs, and MySQL**, with integration of **Metabase** for reporting and analytics dashboards.
- Designed and implemented backend services with focus on scalability, security, and reliable transaction processing across multiple financial service modules.
